

This is the current Descriptive Price List for the products we make in the scale and era in which you have expressed interest, based on your enclosed order. It will be updated on a regular basis and a copy sent with each future order. If more than a month has elapsed since you last ordered from us, and you are ordering by mail as opposed to telephone or internet, please contact us to ensure you are working from the latest list.

It will be fairly obvious to customers that we have had to institute a price code system, rather than printing a straightforward price against each item.

This has been necessitated by the number of products in our ranges (now approaching 20,000 and growing) and by the number of data bases we have had to develop over the years: the possibilities for errors, and the time needed to make changes have been considerable. The need to peg costs and prices is an ever-present spectre, and we hope that the reduction in previous costs and work enabled by this system will help us to do this and to provide you more quickly with more and better products.

The Price Code List included in this Descriptive Price List is applicable right across our own product range. The prices of paint and allied products retained by us on behalf of other manufacturers are listed in the appropriate separate publication.

Simply make a note of the price code next to each product you require and convert it to £:p using the list supplied with this publication.

PLEASE USE A CURRENT PRICE CODE LIST FOR CORRECT UP-TO-DATE PRICES

The V reference number after each description refers to the Volume and Page number of our Everlasting Illustrated Catalogues.

Heritage

BR British Railways STEAM & EARLY DIESEL The Transition Era 1948-1968

Please note that transfer packs are listed under their respective originating Company sections eg British Railways items are listed under BR: FRH 70XX, 78XX, 79XX; Great Western Railway under GWR - Great Western Railway: FRH 71XX; London, Midland & Scottish Railway under LMS - London, Midland & Scottish Railway: FRH 72XX; London North Eastern Railway under LNER - London North Eastern Railway: FRH 73XX; Southern Railway under SOUTHERN - Southern Railway: FRH 74XX.

Constituent Company graphics will be found under the appropriate section - eg South Eastern & Chatham under SOUTHERN - FRH 74XX etc.

Some packs appropriate for BR period use will be found under the original company section. For example, linings for BR Western Region locos are listed under the Great Western Railway section. Only British Railways-designed livery items are included in the FRH 70XX section; Livery items designed by BR for application to 'inherited' locos appear under the appropriate constituent company headings.

PLEASE CHECK TO SEE WHETHER OR NOT THE ITEM YOU SEEK IS IN A CONSTITUENT COMPANY SECTION IF IT IS NOT A BRITISH RAILWAYS PERIOD ORIGINATED ITEM.

Bulleid Light Pacifics: Battle of Britain British Railways

Each British Railways set (34XXX) comprises a pair of nameplates in etched brass with class designation and anti-tarnish finish and incorporating the class name, a smokebox numberplate in stainless steel and, where applicable as indicated by crest, a pair of etched brass shields with ready-fitted multi-colour crests.

All plate sets with references suffixed RB are for Rebuilt Locos and include a brass mounting plate.

Southern Railway sets which include a build dated smokebox ring instead of a smokebox numberplate are also available

Early LMS format - STEEL

All plate sets for the LMS Era (62XX) comprise a pair of stainless steel nameplates. Items suffixed SLSS are for streamlines engines, and sets do not include a smokebox numberplate. Items suffixed SS only are for unstreamlined engines, and sets include an LMS-style smokebox numberplate in stainless steel with black background.

Locos 6235, 6240 and 6254 are believed to have run in service without the city coat-of-arms which later were fitted above the nameplates. We offer nameplates without the coat-of-arms to enable you to replicate this: 6235SLSSNC, 6240SLSSNC and 6254SLSSNC

'The Warships':

Classes 41, 42 and 43

The 600 Series machines - Class 41 - were built by North British in Glasgow, introduced in 1958/1959. Of the 800 Series, D800 - D832 and D866 - D870 were built in the British Railways (ex-GWR) works at Swindon, and the intermediate batch, D833 - D865 commissioned from North British.

The livery story comprises three principal periods: Brunstwick Green with pale grey-blue bodyside stripe (from introduction); Maroon; Rail blue to the end. In the mid-sixties, small yellow warning panels were added to the ends, followed around the turn of the decade by full yellow ends.

Running numbering in the green and maroon periods comprised the condensed style in white, - with seriffed D prefixes, available from Fox on sheet FRH7005 and FRH7005/4, the latter sheet giving fully-made-up numbering for some of the 800 series. On repainting in Rail Blue, these were changed to the Rail typestyle, the D prefixes being removed after the end of the steam era. This numbering is available from Fox on sheet F7310. BR motif application, generally speaking, was as follows: Green period: Later BR steam totem, Fox sheet FRH7002; Maroon period: BR coaching stock roundel: Fox sheet FRH7011; blue period BR white double arrows: Fox sheet F7300/2. Overhead live wire warning flashes (both designs) may be obtained on Fox sheet F7214, or early design only: FRH7020. Data (traffic) panels come on sheet F7360 (later) and F7360/2 (earlier design). Route availability discs (as used on GWR/BR Western Region steam locos) which were only affixed to a few machines are included on sheets FRH7005/4 as mentioned above.

All plates for these classes are in etched stainless steel and include a pair of worksplates as appropriate.

(North British) Class 41 'Warships'

All plates are available in either black or red although the prototype machines did not necessarily carry both colours. Modellers should check with authoritative references before ordering. Generally Green liveries carried red background plate; Maroon and Rail blue liveries carried black background plates. Includes NBL diamond worksplates in stainless steel.
